

## DELBRIDGE, LINWOOD, AURORA, & GARDEN PATH COLLECTIONS

The Delbridge, Linwood, Aurora, and Garden Path Collections feature a beautiful and unique combination of wool and jute fibers. There can be a wide color variance in natural fibers, and each jute strand is made of a special blend of undyed or bleached fibers. Bleached fibers will revert to their natural color over time, as all natural fibers do. Bleached products can be expected to change and will darken over time, while dyed fibers will fade. Sunlight will cause color change. Direct sunlight may have a more dramatic result.

Color differences are more significant with natural fibers due to factors inherent to any crop, such as growing seasons, soil conditions, moisture, sun, time of year, and other natural occurrences. These variations may sometimes be apparent and other times go unnoticed. These unique qualities are not considered to be a defect in material or workmanship but rather appreciated as the beauty of nature.

Showroom samples may not match current inventory. Samples will not be an exact color match to the product that is delivered. All natural fiber carpets and area rugs will have a degree of variation and striations between rolls, within a roll, and within a custom rug.

Understanding and communicating the characteristics of the Delbridge, Linwood, Aurora, and Garden Path Collections will enhance the satisfaction and value to your customer.

Delbridge, Alloy

Linwood, Linen

Linwood, Anchor: bleached jute reverted to original color

Delbridge, Salt: bleached jute reverted to original color
