Katha Living

A Story in Every Weave

Welcome to Katha Living

Floor coverings and textiles have a rich history rooted in ancient times. They represent foundation, grounding, awareness, and presence. A floor covering is the start of it all, the base upon which everything else is layered and evolves. While there is a lot of classic, traditional propriety originating in the world of tapestries and textiles, new constructions, methods, and fibers have changed the industry entirely into a more fashionable and affordable one.

Our goal at Katha Living is to provide responsible and tasteful luxury that springs directly from the skillful artisans whose ancient art and technique have endured the test of time. By putting quality products in the hands of these creative, artistic masters, the result is pure poetry in textile form.

Unparalleled Excellence

Our designs strike a delicate balance between market acceptance and cutting-edge design. While the world is not always ready for the creative and avant-garde, we are constantly in search of what is new and innovative. Sometimes this means taking something traditional and adjusting the fiber and weave just enough to create a better, more versatile product with brand new colors and patterns.

Today's most discriminating designers and clients call for nothing less than ethically crafted products and the utmost in quality. One of the primary touchstones of Katha Living's vision is to create authentic, original designs that offer the best in contemporary construction and ingenuity. We deliver while still maintaining the necessary focus on responsibly sourcing our products and services.

Our mission is to surpass your greatest expectations.
